

REFLECTION 3

Learning Targets and Methods

1. What is your significant takeaway?

It is essential for a teacher to learn how to implement Learning Targets and Methods. This will help them determine what kind of assessment they need to give to their students; this will help them to navigate further into higher education and pursue different approaches on how to handle students on their lessons and aid them to perform critical thinking abilities.

2. How can you apply it?

I can apply this by understanding this first in a level of approach to my students, categorizing targets and implementing methods that can help them achieve something and it must be also aligned to the learning objectives, these two targets and methods gives us an idea on how to handle students in that particular manner
